

Deno

SECURE JAVASCRIPT & TYPESCRIPT RUNTIME

- ✓ *Typescript OOB*
- ✓ *ES6 Import/Export*
- ✓ *Fetch method to call REST APIs*
- ✓ *Global await without async method*

- WHAT WE CAN RUN IN DENO BUT CANNOT IN NODE

- ✓ *Run JS/TS directly from remote*
- ✓ *No need of package manager (NPM) to install packages in advanced*
- ✓ *We can use Deno standard and third-partly modules directly using URLs like browsers without installing them in advanced.*
- ✓ *We can check detail information of TS/JS files and format the source code as well*

- WHAT WE CAN RUN IN DENO BUT CANNOT IN NODE

- ✓ *Global window object with load/unload methods*
- ✓ *Cannot access file & network without using --allow flag*
- ✓ *There are many more features...*
